The Confectionery Foundation is a non-profit organization formed by the National Confectioners Association in 2011 with a mission to support and strengthen the American confectionery industry through education, philanthropy and research. Because the confectionery industry directly generates 187,000 jobs in the U.S. and creates an additional 420,000 jobs indirectly through our networks, our mission is to develop a sustainable pipeline of talent to fill those jobs.
